AMENDMENTS TO THE CLAIMS

1. (Currently Amended) A method of modifying conductive wiring, comprising:

providing a semiconductor substrate;

forming a first barrier on the semiconductor substrate;

forming a conductive wiring on the first barrier;

performing a thermal treatment on the semiconductor substrate;

<u>and</u>

forming a second barrier on the conductive wiring; and after performing the thermal treatment.

performing a thermal treatment on the semiconductor substrate.

- 2. (Original) The method as claimed in claim 1, wherein the first barrier and the second barrier individually comprises a stacked Ti/TiN.
- 3. (Original) The method as claimed in claim 1, wherein the conductive wiring comprises a Cu/Al alloy or a Cu/Al/Si alloy.
- 4. (Original) The method as claimed in claim 1, wherein the thermal treatment is performed by baking.
- 5 .(Original) The method as claimed in claim 1, wherein the thermal treatment is performed by quenching.

$6 \div 7$. (Cancelled)

8. (Original) The method as claimed in claim 1, wherein the thermal treatment is performed in an atmosphere containing nitrogen.

9. (Cancelled)

- 10. (Original) The method as claimed in claim 1, wherein the thermal treatment is performed at a temperature of about 200~400°C.
- 11. (Original) The method as claimed in claim 5, wherein the substrate is quenched from a high temperature range of about 350°C to a low temperature range of about 23°C in a short interval between about 50 to 70 seconds.
- 12. (Currently Amended) A method of modifying conductive wiring, comprising:

providing a semiconductor substrate;

forming a first barrier on the semiconductor substrate;

forming a conductive wiring on the first barrier;

forming a second barrier on the conductive wiring; and

treating the semiconductor substrate with a nitrogen-containing gas[[.]]; and

forming a second barrier on the conductive wiring; and after treating the semiconductor substrate with the nitrogen-containing gas.

- 13. (Original) The method as claimed in claim 12, wherein the first barrier and the second barrier individually comprise a stacked Ti/TiN.
- 14. (Original) The method as claimed in claim 12, wherein the conductive wiring comprises a Cu/Al alloy or a Cu/Al/Si alloy.

15-17. (Cancelled)

18. (Original) The method as claimed in claim 12, wherein the nitrogen-containing gas comprises $N_2\text{O}$ or N_2 .

19-20. (Cancelled)

AMENDMENTS TO THE DRAWINGS

Attached hereto is one (1) sheet of corrected formal drawings that comply with the provisions of 37 C.F.R. § 1.84. The corrected formal drawings incorporate the following drawing changes:

In Fig. 3, the notation "\$104" has been omitted.

It is respectfully requested that the corrected formal drawings be approved and made a part of the record of the above-identified application.
